

PAVLO PUZIK

Washington, WA | 253-314-3519 | pavlopuzik@gmail.com

PROFILE STATEMENT

Computer Science undergraduate focused on network software, embedded systems, and C/Linux development; experienced with OOP, CLI tooling, electronics, and hardware-aware troubleshooting.

EDUCATION

University of Washington

Tacoma, WA

Undergraduate

Expected Graduation: 2026

Major in Computer Science; Minor in Business and Data Analytics

RELEVANT COURSEWORK / PROJECTS

NetScan: Linux C network scanner using ARP, libpcap, and OUI lookup to discover local IPv4 devices.

CLI File Checker: C CLI that identifies file types by magic bytes and compares files with SHA-256 hashes.

Hex Converter: C tool for binary, decimal, and hexadecimal conversion with input validation.

GigFlow: Full-stack marketplace built with React, FastAPI, PostgreSQL, and SQLAlchemy for event discovery, messaging, and vendor workflows.

SKILLS

Programming: C, Java, Go, JavaScript, SQL

Systems / Networking: Linux, Git, Makefiles, CLI tooling, ARP, libpcap, SHA-256

Embedded / Hardware: Electronics, hardware interfacing, blueprint reading, NFPA 70/70E safety awareness

Coursework: Data structures, algorithms, object-oriented design, software development

WORK EXPERIENCE

Amazon AMXL

Sumner, WA

Process Guide

Sep 2022 – Present

- Led troubleshooting and process improvements across physical and virtual workflows to improve inventory accuracy, safety, and handoffs.
- Trained associates and managers on repeatable workflows, translating operational procedures into clear steps.
